

Technology

ADI Time Version 10 was developed using Microsoft .NET web architecture, which ensures scalability, rapid deployment and low total cost of ownership. The application leverages cutting-edge technologies such as XML and Web Services that use open standards to provide you the most cost-effective platform for performing critical business functions rapidly over the Web and allowing different systems to communicate easily with one another.

- Developed in C# on a .NET Framework
- Real Time
- Zero Foot Print
- 100% Managed Code
- Centralized Management
- Reduces Total Cost of Ownership

Licensing Options

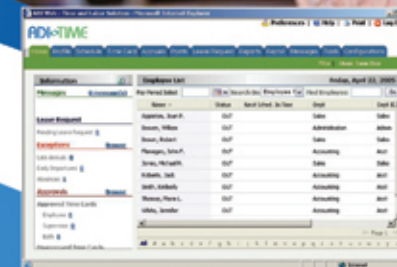

ADI Time Version 10 is available as a secure, Internet-based ASP solution. Some companies prefer to avoid the initial capital expenditure required for a software license and choose instead predictable ongoing monthly payments. With our monthly subscription plan, companies are not required to perform any system maintenance, freeing up their internal IT staff to focus on core competencies. Our ASP model includes services for application hosting, access, networking, all with single-provider service and support.

Our ASP model gives you all of the same functionality, flexibility, and control you get with ADI Time's traditional license model, but with minimal IT maintenance requirements and affordable monthly payments.

➤ **Want to manage your workforce efficiently but don't have the foggiest idea where to start ... or even know what's available?**

HOME

Improving how your company collects and manages Time & Attendance information is no longer a luxury. To remain competitive, a company must optimize its most valuable asset - its workforce - while keeping an eye on cost containment.

5 critical characteristics to demand from your Time & Attendance Supplier:

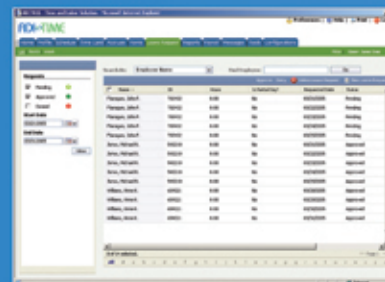

- Leading edge technology
- Ease of deployment
- Superior customer support
- Flexibility
- Low total cost of ownership

A Time & Attendance solution that eliminates manual time tracking is only the first step in realizing a continuous improvement in labor management. A company needs to implement an innovative Time and Attendance solution that addresses your challenges today while being able to handle the requirements of your workforce tomorrow.
