

Humanic Design Payroll

Humanic: Control Your Payroll Department Domestically and Internationally

Humanic's Payroll solutions includes feature-rich applications that addresses the needs of your payroll department both domestically and internationally. As with all Humanic applications Payroll can be easily and securely accessed through any Web browser anywhere in the world at any time.

Humanic Design Payroll:

Humanic's payroll processing software streamlines payroll processes while providing real-time access to accurate and up-to-date information. Humanic Payroll, designed by payroll professionals, provides flexibility and control over payroll management processes.

Integration is easy with Humanic. You will be able to seamlessly integrate your Humanic Payroll solution with your general ledger, time and attendance solution as well as with your respective benefit carriers.

Humanic Payroll features a robust paid time off accrual rules engine that allows set up even the most complicated vacation and sick rule policies.

The Automatic Garnishment calculations are based on federal and state laws eases garnishment administration.

Humanic's Payroll application is fully integrated within a single database. For example, Humanic can produce end-user views of paychecks directly from Humanic Employee Self-Service.

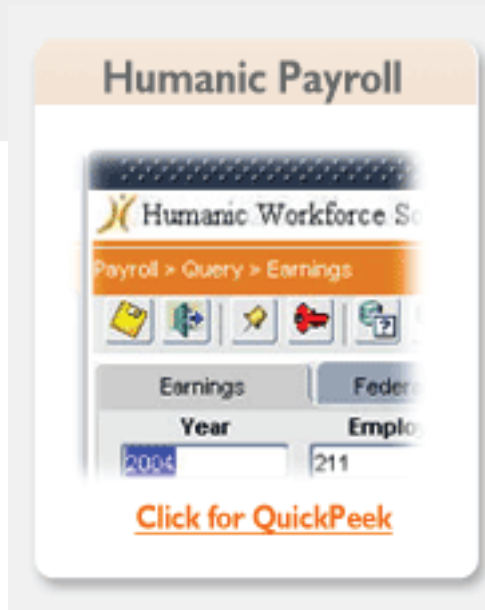

Humanic Payroll makes filing taxes automated and sends electronic files to taxing authorities. The Humanic Payroll system is frequently used with payroll outsourcers for companies that prefer to outsource activities such as check printing, direct deposit processing, garnishment processing, W2 printing and tax filing.

Humanic assures the option to run payroll in-house or pick the processes to outsource. The control of payroll cycles assures Payroll departments are happy while reducing administrative costs.
